FEATURES OF **gürkan** COOLANT SEALED ER COLLETS

- Coolant Sealed performance only when clamped the nominal diameter.
- The shank should be inserted till the back end of the collet as swon in the instruction.
- Suitable for all kinds of ER collet holders
- May also be used as standard ER collet for the nominal diameter cutters without internal coolant
- Less flexible with harder structure compared with standard ER collets
- Other sizes are available on request
- Apply a little higher clamping tork than standard ER application for better grip & precision.
- Please see below clamping instruction for sealing action.
